EMPLOYMENT HISTORY/EXPERIENCE

- Line manager/ Front End Team Lead at Mirum | January 2016 - Present

Overview:

I currently lead a team of 3 developers. This includes project planning meetings with designers and UX to ensure the team works together. I deal with disciplinary action, leave requests, mentoring, code-reviews and promotions. Furthermore, I work with the Red and Yellow School to nurture young learners from previously disadvantaged communities who are currently on the NCIT learnership program. I currently manage 5 learners who have been completing various assignments authored by me. I enforce Codepen and all projects are forked and reviewed.

- Front-End Lead Engineer at Quirk | March 2016 – January 2017
Overview:
My role was to research and implement new Front End technologies in the team. I rolled out a gulp workflow boilerplate for static Web and Drupal projects. I conducted regular code reviews with the team and taught BEM methodology for large projects. I also started team code and plugin discussions in front of the whiteboard to encourage team debate and involvement.
- Mid-Level Front-End Engineer at Quirk | May 2014 – February 2016
Overview:
I was introduced to JavaScript which allowed me to learn the GSAP animation library and specialized in all forms of animation, be it SVG, CSS or .JS. I completed various full website builds.
- Jnr Front-End Engineer at Quirk | March 2013 - April 2014
Overview:
I started with coding mailers to Facebook applications and was always willing to learn from my colleagues. My calling was Front End development.
- Developer Apprentice at Quirk | October 2012 - February 2013
Overview:
I joined the Quirk Create Graduate Program after completing my degree at UCT and assisted with development projects as well some design work.
